Election/Restrictions

1. Claims 60-62 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim.

Applicant timely traversed the restriction (election) requirement.

Applicant argues that the search for one species would necessarily encompass a search for other species. Contrary to applicant's comment, a search for magnet does not require a search in snap lip configuration or pin and hole configuration. They are distinct from one another and thus do not share the same search area. Hence, the restriction is proper and made Final.

Claim Rejections - 35 USC § 112

2. Claim 49 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 49, line 2 "with the holding compartments" should be "within the holding compartments". Appropriate correction is required.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686

Art Unit: 3728

F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 44-58 and 68 are rejected under the judicially created doctrine of double patenting over claims 1-6,8-9,19-24,26-28 of U. S. Patent No. 6,631,806 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: The claims stated above in this application has the same limitation as the patent.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

5. Claims 44-50,52 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6,8 of U.S. Patent No. 6,766,907.

Although the conflicting claims are not identical, they are not patentably distinct from each other

because the limitations in the patent cover the limitations in the pending application after removal of the limitation on releasable coupling. .

Allowable Subject Matter

6. Claims 44-59 and 63-68 would be allowable if rewritten or amended to overcome the double patenting rejection. Claim 49 also has to overcome rejection under 35 U.S.C. 112, second paragraph, set forth in this Office action. Claims 60-62 will also be allowable since they depend from generic claim 57.
